

## Studio di Ingegneria per il Rischio Tecnologico

The measures to be adopted on environmental conservation and worker's safety and health are in constant evolution. A steady effort is needed to keep the pace with the European rules and to cope with the widened companies' responsibilities toward their workers, the environment and the stakeholders.

Legal compliance and technological standards are requiring continuous improvement and skill.

**SIRT is a firm founded by Gianandrea Gino in 1994 that offers the most qualified services in EHS management, in the frame of European and Italian laws and regulations.**

A short list of SIRT expertises.
